

zutto

no more mosquitoes

PROFESSIONAL MOSQUITO REPELLENT SYSTEMS

Zitto, no more mosquitoes

ZITTO is a system of professional machines designed to effectively reduce the presence of mosquitoes in outdoor spaces, making outdoor environments more comfortable, secure and usable over time.

Main Benefits

Eco-friendly

No chemical pesticides

Safe

Suitable for people and pets

Long-lasting effectiveness

Reduces mosquito breeding

Smart and programmable

Managed remotely via an app

Designed for outdoors

Even for large surfaces

Integrated System

The ZITTO system combines capture traps and misting systems to offer complete and continuous protection.

The traps work in the medium to long term, while the misting rapidly reduces the presence of mosquitoes.

Result: Faster, more stable, and longer-lasting protection.

Automatic perimeter mosquito barrier

ZITTO PRO TRAP

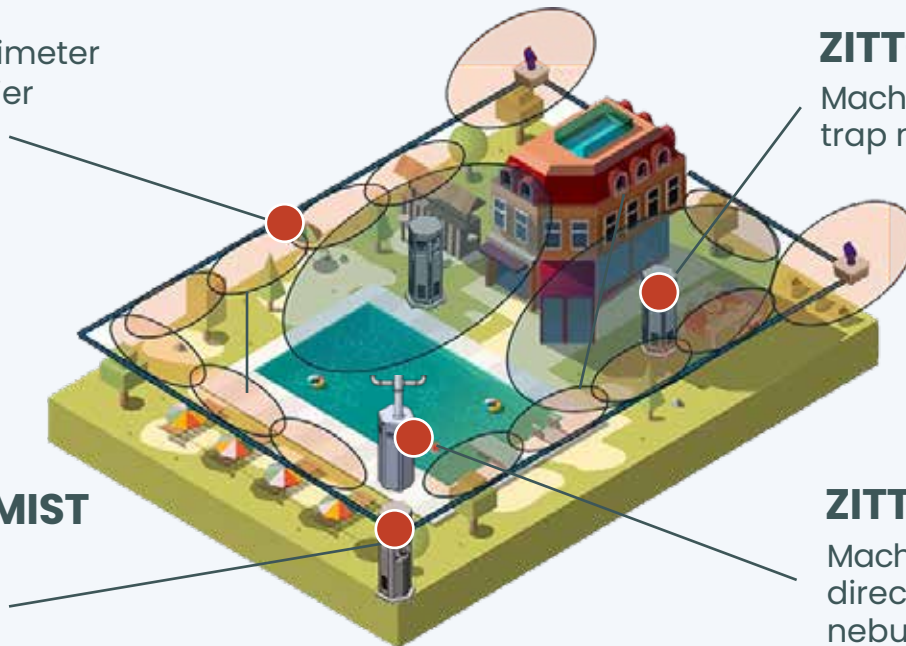

Machine for trap mosquitoes

ZITTO LINE MIST

Machine for mosquito barrier

ZITTO PRO MIST

Machine for directional nebulization

ZITTO PRO TRAP

NATURAL AND LONG-LASTING MOSQUITO REDUCTION

Ecological capture system that simulates human presence

Machine that attracts and traps mosquitoes, gradually reducing their population naturally.

Main Features

4-component attractant

- CO2
- heat
- odour
- light

Progressive population reduction

No use of pesticides

Automatic and programmable operation

ROLE IN THE ZITTO SYSTEM

Medium to long-term effects

ZITTO Pro Trap works in the medium to long-term by interrupting the reproductive cycle and stabilizing the results over time.

ZITTO PRO MIST

INSTANT REDUCTION OF MOSQUITO NUMBERS

Directional nebulization for a rapid and targeted effect

Directional nebulizer designed to rapidly reduce mosquito numbers and immediately improve the comfort of outdoor spaces.

Main Features

Immediate and noticeable effect

Nebulization of natural, plant-based solutions

Targeted coverage, even over large areas

Adjustable and programmable jet

Automatic shutdown in case of strong winds

ROLE IN THE ZITTO SYSTEM

Acts immediately

ZITTO Pro Mist guarantees a rapid reduction in mosquito numbers, supporting the work of the traps and providing immediately noticeable results.

ZITTO LINE MIST

CONTINUOUS PROTECTION OF OUTDOOR SPACES

Automatic perimeter mosquito barrier

Automatic misting system designed to create a protective barrier along the perimeter of outdoor spaces, helping to maintain the area's long-term protection.

Caratteristiche principali

Continuous perimeter barrier

Nebulization of natural plant-based solutions

Ideal for fixed installations

Automatic and programmable operation

Targeted activation during peak mosquito activity

ROLE IN THE ZITTO SYSTEM

ZITTO Line Mist creates constant protection along the perimeter, supporting the action of the traps and reducing the replenishment of mosquitoes from outside..

Ideal for:

Parks and large green areas

Restaurants and outdoor dining areas

Hotels, resorts, and holiday villages

Courtyards, arcades, and open-air spaces

Large-scale outdoor environments

Zitto, mobile application

Quick connection to ZITTO machines

Automatic scheduling

Control of main parameters

Simple and intuitive management
